## MEASURE CHANGE Immunization for Adolescent

The National Committee for Quality Assurance (NCQA) made a change last year to their Technical Specifications for Health Plans. This release reflected a measure change for Immunization for Adolescent.

**Human Papillomavirus (HPV)** vaccine was **added** to Immunizations for Adolescent (IMA). At least three HPV vaccines with different dates of service on or between the member's 9<sup>th</sup> and 13<sup>th</sup> birthday is required for compliance **in addition** to Meningococcal and Tdap.

The table below list the age detail and CPT codes:

Immunizations for Adolescents (IMA)			
	Immunization	Details	CPT
Percentage of adolescents <b>13 years of age</b> who had one dose of meningococcal conjugate vaccine, one tetanus, diphtheria toxoids and acellular pertussis (Tdap) vaccine and three doses of the human papillomavirus (HPV) vaccine by their 13th birthday. The measure calculates a rate for each vaccine and two combination rates.	Meningococcal	1 between 11 <sup>th</sup> – 13 <sup>th</sup> birthday	90644 or 90734
	Tdap	1 between 10 <sup>th</sup> – 13 <sup>th</sup> birthday	90715
	Human Papillomavirus	Three doses between the member's 9 <sup>th</sup> and 13 <sup>th</sup> birthday	90649, 90650, 90651

As a reminder, you can submit these services to Community Health Group through claims (electronically or paper) and/or CHDP (paper or through our web portal).

**Don't forget to also enter all vaccines into the San Diego Immunization Registry (SDIR).**

If you have any questions or need assistance please don't hesitate to call Gabriela Rubalcava, HEDIS Manager, at (619) 498-6535.

Thank you in advance for your cooperation.
